[ILN000019_Cahokia Heights_revised CMOM Clarification Comments_20221007.pdf](#)
Importance: High

Thank you Jim. I reviewed the revised CMOM and Wet Weather Investigation Plan. I think we need to resolve a few more things in the CMOM, and specifically the staffing/lift station inspection comment which was not resolved. I attached the of clarification comments for the CMOM to this email.

The Wet Weather Investigation Plan is improved but we need to more clearly describe the work completed and planned for each area, as requested in our previous comments. Think of each area as a standalone project, and we will need details for each, including planned and/or completed investigation activities, and schedules.

I propose the best way to resolve remaining concerns regarding both the CMOM and WW investigation plan would be to have a face-to-face meeting where we can work through each issue. I will provide some suggested dates once I discuss with our team at EPA.

Thanks,

Dean
